

Student assistant wanted (Linux) System Administrator

For the support of the lab in the LOEWE research center emergenCITY (www.emergencity.de) we are looking for a student assistant with a monthly working time of **30 hours** (or according to agreement) starting in **February 2021**. A long-term collaboration is desired.

The goal of emergenCITY is to research foundations, methods and solutions for future resilient digital cities. The team consists of 23 professors in the fields of computer science, electrical engineering and information technology, mechanical engineering, political science, history, law, economics, and architecture.

Tasks:

- Support in the technical management of the research center
- Support in the operation of the laboratory
- Maintenance and support of the infrastructure (Proxmox, Ceph, 10GBASE-LR/SR network)
- Maintenance of databases and documentation
- First level support in the configuration of staff computers (to a limited extent)

Requirements:

- Experience with programming and scripting languages (especially Bash, Python)
- Experience with the administration of Linux, Windows and MacOS hosts and networks
- Very good Linux skills
- fluent in English
- organizational skills
- Reliability and time flexibility
- Enjoy interdisciplinary work
- Experience with NixOS, Ansible, YAML, LDAP advantageous

We offer:

- diverse activities in the lab and project management
- work with state-of-the-art technology
- pleasant working atmosphere in an interdisciplinary team
- insight into the management of collaborative research projects
- flexible working hours
- possibility of longer-term employment

Please apply by emailing a CV, resume, and a recent transcript of records from Tucan to: hiwi-lab-bewerbung@emergencity.de

Deadline for applications: 15.1.2021
